

# **ARTERIAL SEGMENTAL DOPPLER ULTRASOUND**

## **Purpose:**

To evaluate the arteries of the arms or legs.

## **How long will this procedure take?**

This examination will take 30 to 60 minutes.

## **Preparation:**

None.

## **Procedure:**

The technologists will apply a blood pressure cuff to arms and legs to obtain arterial images. The cuff may become tight enough to cause discomfort.

## **After the examination:**

This exam is interpreted by a surgeon; the report can take up to 5 days to be returned to your physician.
